AMPL Academic Price List

These prices apply to purchases by degree-awarding institutions for use in noncommercial teaching and research activities. Products covered by academic prices are full-featured and have no arbitrary limits on problem size.

	Single	Floating
AMPL	\$400	\$600

Linear/quadratic solvers:

CPLEX	<i>free 1-year licenses available: see below</i>	
Gurobi	<i>free 1-year licenses available: see below</i>	
Xpress	<i>free 1-year licenses available: see below</i>	

Nonlinear solvers:

Artelys Knitro	\$400	\$600
CONOPT	\$400	\$600
LOQO	\$300	\$450
MINOS	\$300	\$450
SNOPT	\$320	\$480

Alternative solvers:

BARON	\$400	\$600
LGO	\$200	\$300
LocalSolver	\$950	\$1900

AMPL prices are for the AMPL modeling language and system, including the AMPL command-line and IDE development tools and the AMPL API programming libraries. To make use of AMPL it is necessary to also obtain at least one solver having an AMPL interface. Solvers may be obtained from us or from another source.

As listed above, we offer many popular solvers for direct purchase; refer to www.ampl.com/products/solvers/solvers-we-sell/ to learn more, including problem types supported and methods used. Our prices for these solvers apply to the versions that incorporate an AMPL interface; a previously or concurrently purchased copy of the AMPL software is needed to use these versions. Programming libraries and other forms of these solvers are not included.

AMPL may also be purchased alone for connection to solvers sold by other vendors and to noncommercial or experimental solvers. Pointers to detailed information about solver alternatives may be found at www.ampl.com/solvers.html.

License types

Each *single* license allows the product to be run by any number of users in any number of simultaneous processes, on one designated computer. (KNITRO is limited to one user.)

Each *floating* license allows one single license at a time to be activated on any computer where the product is installed. One computer must be designated as the license server; it may manage any number of floating licenses and may be configured to restrict requests to a specified list of network (IP) address ranges.

Free 1-year academic solver licenses

Upon request and appropriate registration we can supply *free 1-year academic CPLEX, Gurobi, and Xpress licenses* of the same number and type as purchased academic AMPL licenses. Subject to continued participation by the solver developers, these free licenses can be renewed for additional 1-year terms when AMPL maintenance and support service, described below, is also renewed.

To receive the free 1-year academic CPLEX license, you must affirm that you are entitled to receive the CPLEX solver under the terms of the IBM Academic Initiative. You can register for this IBM program at <https://developer.ibm.com/academic/>.

To receive the free 1-year academic Xpress license, you must affirm that you are entitled to receive the Xpress solver under the terms of the FICO Academic Partner Program. You can apply for this FICO program at <http://subscribe.fico.com/Academic-Partner-Program>.

Standard academic Gurobi and Xpress licenses are also available for purchase; contact us at sales@ampl.com for details.

Maintenance

AMPL maintenance and support service includes access to AMPL and solver software updates, regeneration of license files necessitated by hardware changes, and technical assistance with installation and execution. The quoted prices include one year of maintenance and support. Subsequent maintenance and support service is charged at an annual rate equal to a percentage, currently 20%, of the license price in effect at the time of renewal.

Maintenance and support will be billed annually unless cancelled in writing by the customer prior to the renewal date. Contact us at sales@ampl.com for information on upgrades to copies not currently under maintenance.

Volume Discounts

Discounts may be available on purchases of multiple AMPL or solver licenses. Previous purchases can be counted toward volume discounts provided their maintenance is current. Please contact us at sales@ampl.com for details.

Prices on this list are effective January 2017 and supersede all previously listed prices.
